You, working with OAR, OGC, and NCEE, need to prepare responses to each of the 90+ comments. You can provide responses to OMB by inserting them in red text below each comment in the document that OMB forwarded to you and/or make changes in the preamble or RIA and note the location on the OMB document.

You don't need to accept all or any of the comments, but just like with public comments, you have to provide a good rationale in each of your responses. OMB will circulate your responses (as well as a RLSO of any document if appropriate) back to the interagency group. And then one or more teleconferences (as well as RLSO passbacks), extending over days or weeks, will be used to resolve the issues. If EPA and another agency (including OMB) can't resolve an issue at the staff level, it will be elevated up the management chain as appropriate.

I'd start by identifying the easy ones to respond to, and then work your way up the headache gradient.

I've just begun to read them, and I can see there are at least two divergent comments,

Bruce,

Can you please advise our next steps in this process?

Thanks,

Claudia
